TITLE : CRIME PREVENTION DEVICE
PROVIDED WITH THERMAL SENSOR
AND MONITORING CAMERA

(a)

(b)

ABSTRACT : PROBLEM TO BE SOLVED: To provide a thermal sensor whose angular aperture of a visual field as a whole is about 360° and a monitoring camera and to turn the monitoring camera to the visual field direction of the thermal sensor which has outputted a signal.

SOLUTION: Each of thermal sensor parts 1 to 3 is provided with a pyroelectric element and a reflection mirror, and the visual field spread of a warning zone is made to be about 120°. The a turntable 4 is disposed in the part surrounded by the parts 1 to 3, and a monitoring camera 5 is fixed to the turntable 4 with a prescribed angle. When a controller receives an outputted signal from a signal processing circuit, the controller instructs a turntable driving part to turn the turntable so as to change the direction of the monitoring camera to the angle direction of the thermal sensor part corresponding to the signal processing circuit outputting the signal on the basis of the angle direction of the thermal sensor part corresponding to the signal processing circuit outputting the signal and the current angle detected by an angle detecting part.
